TITLE.

Impact resistant resin composition for

electrical/electronic component - comprises polypropylene resin, polyphenylene ether resin and hydrogenated block

corolymer...

DERWENT CLASS:

A17 A25

PATENT ASSIGNEE(S):

(ASAH) ASAHI KASEI KOGYO EK

COUNTRY COUNT:

1

AN 1999-232740 [20] WPINDEX

JP 11060836 A UPAB: 19990525

A resin composition includes (a) 45 - 95 wt. % of a polypropylene resin, (b) 55 - 5 wt. % of polyphenylene ether resin, (c)1 - 30 pt. wt to 100 pt. wt in total, of (a) and (b), of a hydrogenated block copolymer prepared by hydrogenating a block copolymer composed of at least one polymer block B mainly composed of conjugate diene compound including 30 - 90 % in total of 1, 2-vinyl bond and 3, 4-vinyl bond of conjugate diene, and at least one polymer block A mainly composed of a vinyl aromatic compound, and (d) 1 - 400 pt. wt to 100 pt. wt of (b), of rubber reinforcement impact-proof polystyrene resin having 0.14 - 0.70 micrcn m of average diameter of rubber dispersion particles.

USE - Effectively used in the electric and electronic components, office equipment housing, automobile components, precision components, and various industrial components.

ADVANTAGE - The resin composition superior in the impact resistance can be prepared.
